

More than 32 years of experience

C1 Maxi end post designed for vineyards with very high loads and a high height above ground
Recommended for total height between 2.30 to 3.00 mtr in thickness 1.80/2.00/1.95/2.15 mm

Main Advantages

- ◆ Profiling without any angle in order not to damage during mechanical contacts
- ◆ Special cross section to protect the open side of the post (60 x 40 mm – 2.36'' x 1.57'')
- ◆ Optimal compromise between flexibility and high mechanical strength
- ◆ To plant closed face facing the row
- ◆ Strong ability to install in difficult soil
- ◆ Side 40 mm to optimize the stability of the trellising
- ◆ Wire in contact with the internal structure of the post
- ◆ Double hook for the wires during the soil cultivation

Galvanization

Weighting per mtr	1.59	1.91	2.11	1.70	1.91	2.11	1.75	2.10	2.32

Type of hook

- ◆ **A Type (on demand number of hooks)**

Recommendations

- ◆ Row from 100 to 150 mtr 1.8 or 1.95 mm
- ◆ Row more 150 mtr 2.0 or 2.15 mm

Installation advice

- ◆ Cap and mini piston on request
- ◆ Plant the post during the wet season
- ◆ Drive 25-30 % of the post length into the ground
- ◆ Deep rip soils during site preparation
- ◆ Drill a pilot hole in difficult ground
- ◆ Adaptation of the inter-distance between the posts in particular (windy area-high production in hectoliter-high degree of mechanization)
